**River City: How Immersion in Virtual Worlds Helps Real Students**

Chris Dede

5002

River City is a science curriculum, grades 6 to 9, based on a virtual world rather like the Internet games many students find so engaging. The curriculum is designed to help all students learn, but particularly low performing pupils, paradoxically by giving them more complex academic challenges rather than simplifying instruction. This talk will demonstrate and discuss how taking on a digital identity in an immersive, collaborative simulation can help real students to learn sophisticated inquiry skills and deep, standards-based subject matter.
