

Classroom Presentations!

Save The Whales is a nonprofit 501(c)(3) organization founded in 1977. Our purpose is to educate children and adults about marine mammals, their environment and their preservation. Save The Whales has educated over 275,000 students.

The following hands-on programs fulfill certain California Science Content Standards. Qualified instructors will make each visit a stimulating educational experience, and provide free teacher materials.

The Land & Sea Watershed Model - FREE

See how human actions on land flow directly to the sea through storm drains. Students will “pollute” the hands-on model and simulate rain, which leads to creeks, rivers and oceans. Presented in partnership with the Stormwater & Education Alliance (SEA). Learn how *one person can make a difference*.

Grades 4-Adult

Whales On Wheels WOW™

Dive-in with a hands-on mini-museum that introduces marine mammals and conservation messages. WOW™ Brings bones of baleen whales, clicks of cetaceans, pelts of pinnipeds, skulls of sea mammals, and tales of toothed whales.

Grades 3-Adult

Marine Mammals: Adaptations and Communication

Discover behavioral adaptations, communications of whales and dolphins in their marine environment, and food web. Understand the delicate balance that binds us together.

Grades 1-10

Sea Otters: A Story of Survival

Explore natural history, ecology, and survival of the California sea otters. This program covers topics as diverse as feeding and keystone species, adaptations and survival, human impacts, and water quality. Learn what you can do now to help protect sea otters from extinction.

Grades 1-10

Fees

- The Land & Sea presentation is **FREE**.
- A sliding fee scale is available to financially limited schools.
- Follow-up visits from the other choices are:
\$75 for the first class;
\$55 each additional class.
- A mileage fee will be added for long-distance travel.
- Class size is limited to approximately 30 students.
- All contributions support Save The Whales' educational programs.
