

Learning Language, Learning SCIENCE

Working with English Language Learners

a professional
development
opportunity for
informal science
educators

English language learners visiting informal science settings potentially face two challenges--navigating the English language and engaging in the language of science. For this two-part workshop, we'll examine these challenges and introduce teaching strategies that can reach both second-language learners **and** native speakers alike. Participants will have the opportunity to observe, analyze and share their efforts at making science learning possible for all.

Part 1: Wed, April 21st, 2010

5pm to 8pm

Location: Discovery Science Center, Santa Ana

Part 2 : Wed, May 12th, 2010

5pm to 8pm

Location: The Ocean Institute, Dana Point

Space is LIMITED

To RSVP, email to jkisiel@csulb.edu or call 562-985-1325 *no later than April 18th*. Be sure to include your contact and institutional information. Directions and additional workshop info will be provided.

Workshop participants will receive:

- free reference materials and books related to the workshop
- travel stipends of up to \$20 for each part of the workshop
- food and refreshments during each workshop

Workshop participants are expected to:

- bring *at least one other person* from their institution
- attend both sessions
- reflect on their teaching practice, and share their experiences with other participants

Third in a series of FREE workshops sponsored by the ISICSU Collaborative - a group of California State Universities and Informal Science Institutions in support of science education. Funding provided through generous support of the Boeing Company
