SISC'S VIDEO LIBRARY

The following videos are available for loan from the SISC Safety and Loss Control department.

GENERAL INTEREST

ABCs of Supervision An onscreen narrator reinforces the major points of SAFE playgrounds. A must for people involved in playground supervision and training. VHS/13 Minutes

Advanced Techniques for Special Ed Bus Drivers Key points: How to protect your back when assisting an ambulatory student; Proper response to a student having a seizure; the role communication plays between parents, drivers, and students; Bloodborne pathogen cleanup for a Special Ed bus driver; Tips on time management when loading and unloading students; Demonstrations on loading and unloading techniques. VHS/18 Minutes

Adventures of the Disaster Dudes A discussion about disaster preparedness with children in the 4th-6th grades. VHS/13 Minutes - **with presenter's guide**

Africanized Honey Bee Show & Tell Kit Instructional materials, including videotape, slide program (in English and Spanish), color posters, lesson plans, resin-encapsulated Africanized and European honey bees, and more, come in a box identical to bee traps used by government scientists for capturing AHB's to study them and monitor their movements. Developed and distributed by the Texas Agricultural Extension Service.

Art Safety - Hazards & Precautions Lecture on many topics of art safety and occupational health and hazards. VHS/49 Minutes and 53 Minutes (2 Sessions)

The Back Care Program A series of five training modules dedicated to training employees on proper use and care of the back.

Module 1: "Back Facts" teaches how the back works, how injuries occur, and how to have a healthy back. VHS/30 Minutes

Module 2: "Common Causes of Back Problems" teaches how to recognize harmful conditions and to change or eliminate them. VHS/30 Minutes

Module 3: "Treatment of Back Problems" shows the most common types of back problems and how a medical practitioner can treat them. VHS/30 Minutes

Module 4: "Ergonomics and Body Mechanics" concentrates on good body mechanics and proper sitting, pulling and lifting techniques. VHS/30 Minutes

Module 5: "Healthy Back Exercises" discusses and demonstrates exercise and fitness techniques for a healthy back. VHS/30 Minutes

Bend Your Knees The video discusses why back injuries occur and how to avoid them. VHS/22 Minutes

Bloodborne Pathogens General Awareness Provides the basic information required to protect employees from bloodborne pathogen exposures.

Bloodborne Pathogens In Schools - Real Real Life This video discusses the three A's—*Awareness*,

Attitude, and Action—of bloodborne pathogens (BBP) in schools. Information is provided on identification of BBP, transmission, personal protection, and control methods. VHS/20:30 Minutes

Bloodborne Pathogens-Protection In Educational Environments This video details OSHA's Bloodborne Pathogens Standard (1910.1030) and the training specifically mandated for educators. VHS/20 Minutes

Breaking Up Fights Breaking Up Fights is a brief, informative video for training staff on specific techniques they can use when violence occurs. The video teaches verbal intervention techniques, physical intervention options, and how to respond in a way that will minimize the risk of injuries to staff and students.

Chaos To Calm - Creating Safe Schools Explores the programs and personalities that have turned "battlefields" into model campuses

Children & Trauma - The School's Response Trauma's impact on children and schools, normal and prolonged stress responses, assessment considerations, and intervention models are presented. Targeted are traumas associated with earthquakes, etc. VHS/20 Minutes

Computer Usage Helps eliminate complacency by reminding viewers of the serious injuries, including cumulative trauma disorders (CTDs) that can be sustained by people in "safe" office environments. Examines common CTDs including carpal tunnel syndrome, tendinitis and rotator cuff injuries, demonstrating how they result from a combination of activities and gives advice on arranging one's workstation. VHS

Conflict Communication Skills An excellent video for all district employees. This video points out how an employee can defuse hostility by learning the 12 conflict communication skills. The packet contains a short questionnaire that can be used as a teaching tool. VHS/14 Minutes

Controlling Your Risks of HIV in the Research Laboratory Demonstrations of good safety techniques, re-enactments of actual laboratory accidents, and questions that challenge you to recognize the risks in the laboratory. Technical information--may not be appropriate for school labs.

Electrical Safety Overview Geared to all audiences on safety awareness. Covers basic safety rules when working with electrical equipment. VHS/10 Minutes

Employee Safety Orientation Meets OSHA requirements for training the general hazards regarding exposure, proper clothing, personal protective equipment, machine guarding, reporting accidents and additional safety reminders. VHS/14 Minutes.

Ergonomics Awareness Stresses the key role employees can play in identifying ergonomic concerns and making adjustments to their own work habits and processes. It identifies common sources of cumulative trauma disorders (CTDs) and other injuries and suggests initiatives employees can take to protect themselves. VHS

Fire Extinguishers This video covers important information for training fire extinguisher basics and fire prevention. It demonstrates how to use fire extinguishers and the different classes of extinguishers. VHS/12 Minutes

FISH Imagine a workplace where everyone chooses to bring energy, passion, and a positive attitude with them each day. An environment in which people are truly connected to their work, to their colleagues, and to

their customers. Impossible? Not at all. FISH! Is a tool to help you lead people toward creating that environment.

Forklift Operator Training Written by the National Safety Council. Can be used for operator training. Covers safe operation, load handling, etc. Instructor's manual also available.

Get Well Soon Preventing injuries in the office. Emphasizes slips, trips, and falls. VHS/25 Minutes

Hazard Communication For Schools-The Road to Safety Compliance with OSHA's most-cited standard (1910.1200) is made easier with this new program designed specifically for educators. This program details the training requirements of the Hazcom standard, explains various physical and health hazards, and teaches you how to use warning labels and MSDS properly. VHS/17 Minutes

Hazard Communications the New Millennium Provides information regarding compliance with the requirements of the Hazard Communication Standard: Definition of hazardous materials; Written Hazcom plan and requirements; Hazard classification system, routes of entry; MSDS, proper labeling and storage. 26:37 Min

Integrated Pest Management for Schools (IPM) Module 1-An Introduction Defines the concept of IPM, shows how IPM can be used in a school setting, and explains the importance of IPM to the health and safety of school children, while emphasizing the importance of cooperation to the success of an IPM Program. VHS/13 Minutes

Integrated Pest Management for Schools (IPM) Module 2-Structural Pest Control Demonstrates the "how-tos" of applying IPM to the most common pest problems found in non-food handling areas of school facilities, stresses the importance of sanitation and structural modifications in reducing pest problems, and explains chemical application techniques, IPM principles and a four-step process for implementing IPM programs in schools. VHS/17 Minutes

Integrated Pest Management for Schools (IPM) Module 3-Food Handling Areas Focuses on controlling pest problems in food handling areas, teaches both pest control operators and kitchen staff the how-tos of many common IPM tasks, and demonstrates a four-step IPM approach using the common German cockroach as an example. VHS/ 13 Minutes

Integrated Pest Management for Schools (IPM) Module 4-Bids and Contracts Outlines the steps in developing a bidding process for commercial IPM providers to school systems, defines IPM principles, explains the role of the contract officer and the importance of clearly defined bid specifications, and emphasizes how to avoid problems in IPM contractual agreements. VHS/13 Minutes

Integrated Pest Management for Schools (IPM) Module 5-The Administrative Challenge Explains from an administrator's perspective the importance of having a clear IPM policy and the importance of cooperation and communication in a school IPM plan. Emphasizes the benefits of an IPM plan to a school system and the role of an IPM coordinator. VHS/10 Minutes

Integrated Pest Management for Schools (IPM) Module 6-Landscaping Provides a comprehensive overview of the elements of IPM in landscape areas. Outlines the specifics of mechanical, cultural, biological, and chemical control methods. VHS/25 Minutes

Introduction to Special Ed Bus Driving Safety A bus driver instructor takes a new trainee through all of the most important training procedures that a Special Ed bus driver will be required to perform. VHS/18 Min

Inspecting Playgrounds for Hazards This program covers: Intro/overview of the playground safety issues; Developing checklists; Determining frequency of inspections; Playground surfacing overview; Maintenance inspections and checkpoints; Design related inspections; Conducting a CPSC safety evaluation; and much more. VHS/35 Minutes

Office Safety: It's A Jungle In There Every year, about 4000,000 office workers get hurt at work. This video shows how working in an office is a lot like being in the jungle—the dangers are hidden and subtle. VHS/20 Minutes

Operating Forklifts Safely This program is designed to teach workers how to operate forklifts safely, including loading and unloading, maintenance checks, and safe driving.

Panama-Buena Vista Union S.D. Presents: Mission Possible Set in a humorous tone, this video provides a refresher of various safety issues and policies for the Panama-Buena Vista Union School District (P-BV). It is an excellent orientation and retraining tool. Although this video is specific to P-BV, the video can be used as an outline to develop similar videos in other districts.

Playground Discipline A video in-service program for principals, teachers, and playground supervisors. Teaches positive techniques for recess supervisors.

Session 1: Getting Ready: Setting up an administrative program. VHS/40 Minutes

Session 2: Positive Supervision. VHS/46 Minutes

Playground Safety-Inspection & Maintenance of Playgrounds How to conduct safety inspections on playgrounds and what to look for. VHS/15 Minutes

Playgrounds - Providing Safe Challenges This video is about children's playgrounds, and is to encourage all those concerned with children's safety to be aware of the dangers associated with playgrounds. VHS/29 Minutes

Practicing Safe Science Demonstrations of good safety techniques, re-enactments of actual laboratory accidents, and questions that challenge you to recognize the risks in the laboratory.

Protective Clothing and Equipment Gives employees the information they need to select the appropriate equipment for the hazards they face. Teaches the correct way to wear, maintain, and store protective clothing and equipment. Incorporates the latest OSHA regulations and requirements on fit-testing protocols. VHS/25 Minutes

Recordkeeping by Requirements for Workplace Recordable Injuries An overview of OSHA recordable and reportable injury recordkeeping. Covers accident investigation and proper completion of records. VHS/11 Minutes

Report on Serious Football Injuries

Safe Playgrounds An informative video designed to provide an overview of the importance of supervision, age appropriate design, falls to surfaces, and equipment maintenance to playground safety. An excellent educational tool to use in discussing playground safety with professional and community groups. VHS/15 Minutes

Safe Schools - A Guide For Action Offers a simple proven method that your school can use to create a safe and positive learning environment. Learn how parents, teachers, school administrators, students, businesses, law enforcement and communities have worked together to create truly safe schools.

Safety Awareness Points covered: safety attitudes, ladders, PPE, lift trucks, MSDS, back injuries, slips-trips-falls, power tools, lockout/tagout, and confined space. VHS/ 18 Minutes

Safety in the Research Laboratory - Set One Radionuclide Hazards, Chemical Hazards and Emergency Response

Safety in the Research Laboratory - Set Two Centrifugation Hazards, Chemical Storage Hazards and Glassware Washing Hazards

Sammy's Playground Pointers A playground-related injury brings Sammy, the Raccoon, to the school nurse's office. As he describes his recess adventures, Nurse Meyers and Frieda, a student playground helper, suggest ways to play safely. Key points include informing kids that equipment is age specific and the importance of telling adults about problems. An excellent educational tool to use with children grades K-3. Educates with music, drama, humor, and rhyme. Teaching guide accompanies the video. VHS/10 Minutes

Sexual Harassment: Serious Business This video is designed to help employees—as well as supervisors, managers and other personnel—understand the impact of hostile environment and quid pro quo harassment on the individual and the company; Be aware of how our actions or behavior affects co-workers; Recognize and stop harassing behavior and replace it with respect; and Prevent sexual harassment in the workplace by promoting open lines of communication. VHS/30 Minutes

Smith Systems This Smith Systems video can be defined in one word, *precaution*. The information and techniques on this video are primarily for experienced drivers to help them build on years of on-road experience. The Smith System is a series of interlocking techniques for preventing accidents. The techniques are precautionary measures that helps drivers see, think, and act their way through the multitude of driving environments, challenges, and changes that exist no matter where they travel or what types of vehicles they operate. There are four sections to this video: 1) *Street Smart*, 19 Minutes; 2) *The Most Common Collision*, 20 Minutes; 3) *Shortcut to Experience*, 15 Minutes; 4) *It's Your Choice*, 10 Minutes

Step-By-Step Safety Training Program This ladder safety program is designed to teach users how to use a ladder properly and safely. Viewers will learn how to choose the right ladder for each job and how to set it up, how to spot a damaged ladder, and how to work safely while on the ladder.

Time Out for Safety This video is presented by playground professional Terri Hendy. The video briefly explains the major causes of playground accidents and things to be aware of on public playgrounds such as proper surfacing, entrapments, entanglements, etc. The video also stresses the importance of playground maintenance, age-appropriateness, and supervision. VHS/10 Minutes

Universal Precautions for School Staff A training video on bloodborne pathogens. VHS/16 Minutes

Workstation Adjustment Encourages employees to adjust their workstations to achieve the right fit for them. It shows optimal heights for work surfaces, proper posture to maintain in seated or standing work and minor modifications that can be made to equipment, and stresses that a workstation can and should be tailored to the needs of the person who works at it. VHS

You and Your Spine: Back Education for Special Education VHS/17.05 Minutes

EMERGENCY PREPARATION

Adventures of the Disaster Dudes A discussion about disaster preparedness with children in the 4th - 6th grades. VHS/13 Minutes - **with presenter's guide**

Before It's Too Late Information on earthquakes. VHS/17 Minutes

Bloodborne Pathogens General Awareness Provides the basic information required to protect employees from bloodborne pathogen exposures.

Bloodborne Pathogens In Schools - Real Real Life This video discusses the three A's—*Awareness, Attitude, and Action*—of bloodborne pathogens (BBP) in schools. Information is provided on identification of BBP, transmission, personal protection, and control methods. VHS/20:30 Minutes

Bloodborne Pathogens-Protection In Educational Environments This video details OSHA's Bloodborne Pathogens Standard (1910.1030) and the training specifically mandated for educators. VHS/20 Minutes

Chaos To Calm - Creating Safe Schools Explores the programs and personalities that have turned "battlegrounds" into model campuses.

Children & Trauma - The School's Response Trauma's impact on children and schools, normal and prolonged stress responses, assessment considerations, and intervention models are presented. Targeted are traumas associated with earthquakes, etc. VHS/20 Minutes

Disaster Preparedness Information regarding earthquakes, fires, floods, landslides, storms, war, industrial accidents, air pollution, air crashes, etc. VHS/14 Minutes

Earthquake Damage A guide for schools. VHS/14 Minutes

Hazard Communication For Schools-The Road to Safety Compliance with OSHA's most-cited standard (1910.1200) is made easier with this new program designed specifically for educators. This program details the training requirements of the Hazcom standard, explains various physical and health hazards, and teaches you how to use warning labels and MSDS properly. VHS/17 Minutes

Hazard Communications the New Millennium Provides information regarding compliance with the requirements of the Hazard Communication Standard: Definition of hazardous materials; Written Hazcom plan and requirements; Hazard classification system, routes of entry; MSDS, proper labeling and storage. 26:37 Min

Movers and Shakers - An Earthquake Preparedness Program Developed to help educators integrate information about earthquakes and earthquake preparedness. Critical thinking, decision-making, planning and group cooperation skills are emphasized in lessons and activities targeted to specific grade levels. VHS/22 Minutes

Safe Schools - A Guide For Action Offers a simple proven method that your school can use to create a safe and positive learning environment. Learn how parents, teachers, school administrators, students, businesses, law enforcement and communities have worked together to create truly safe schools.

Schools Can Burn: A Pre-Loss Primer This video includes some steps to take to ensure that your school district's personnel are able to react effectively in the event of a fire in one or more of your facilities. It also deals with the proper storage of important records and the keeping of a detailed inventory of building contents. VHS/17 Minutes

Sexual Harassment: Serious Business This video is designed to help employees—as well as supervisors, managers and other personnel—understand the impact of hostile environment and quid pro quo harassment on the individual and the company; Be aware of how our actions or behavior affects co-workers; Recognize and stop harassing behavior and replace it with respect; and Prevent sexual harassment in the workplace by promoting open lines of communication. VHS/30 Minutes

Universal Precautions for School Staff A training video on bloodborne pathogens. VHS/16 Minutes

When Your School Burns: Making Order from Chaos This video walks you through some steps to take if your district experiences a fire loss. VHS/18 Minutes

While There's Still Time An excellent earthquake preparedness video. VHS/15 Minutes

Yogi Bear Earthquake Preparedness A video designed to help children understand and prepare for an earthquake. VHS/6 Minutes

FOOD SERVICES

The Back Care Program A series of five training modules dedicated to training employees on proper use and care of the back.

Module 1: "Back Facts" teaches how the back works, how injuries occur, and how to have a healthy back. VHS/30 Minutes

Module 2: "Common Causes of Back Problems" teaches how to recognize harmful conditions and to change or eliminate them. VHS/30 Minutes

Module 3: "Treatment of Back Problems" shows the most common types of back problems and how a medical practitioner can treat them. VHS/30 Minutes

Module 4: "Ergonomics and Body Mechanics" concentrates on good body mechanics and proper sitting, pulling and lifting techniques. VHS/30 Minutes

Module 5: "Healthy Back Exercises" discusses and demonstrates exercise and fitness techniques for a healthy back. VHS/30 Minutes

Bend Your Knees The video discusses why back injuries occur and how to avoid them. VHS/22 Minutes

FISH Imagine a workplace where everyone chooses to bring energy, passion, and a positive attitude with them each day. An environment in which people are truly connected to their work, to their colleagues, and to their customers. Impossible? Not at all. FISH! Is a tool to help you lead people toward creating that environment.

Hazard Communication For Schools-The Road to Safety Compliance with OSHA's most-cited standard (1910.1200) is made easier with this new program designed specifically for educators. This program details the training requirements of the Hazcom standard, explains various physical and health hazards, and teaches you how to use warning labels and MSDS properly. VHS/17 Minutes

Hazard Communications the New Millennium Provides information regarding compliance with the requirements of the Hazard Communication Standard: Definition of hazardous materials; Written Hazcom plan and requirements; Hazard classification system, routes of entry; MSDS, proper labeling and storage. 26:37 Min

Kitchen Safety Covers the various hazards specific to kitchen operations. The information presented includes: handling knives, housekeeping, hygiene, lifting, steamers, etc. VHS/14 Minutes

Loss Prevention for Food Service Workers VHS/15 Minutes

Office Safety: It's A Jungle In There Every year, about 4000,000 office workers get hurt at work. This video shows how working in an office is a lot like being in the jungle—the dangers are hidden and subtle. VHS/20 Minutes

Sexual Harassment: Serious Business This video is designed to help employees—as well as supervisors, managers and other personnel—understand the impact of hostile environment and quid pro quo harassment on the individual and the company; Be aware of how our actions or behavior affects co-workers; Recognize and stop harassing behavior and replace it with respect; and Prevent sexual harassment in the workplace by promoting open lines of communication. VHS/30 Minutes

You and Your Spine: Back Education for Special Education VHS/17.05 Minutes

HAZARDOUS MATERIALS

Employee Introduction to RCRA Designed to make all employees aware of their hazardous waste responsibilities. Workers learn their important role in protecting themselves, your company, and the environment. VHS/25 Minutes

Handling Spills in the Workplace New live-action video shows actual employees as they react intelligently to the most common hazardous material spills. Workers learn the simple techniques that can make the difference between a major disaster and a minor inconvenience. VHS/18 Minutes

Hazard Communication For Schools-The Road to Safety Compliance with OSHA's most-cited standard (1910.1200) is made easier with this new program designed specifically for educators. This program details the training requirements of the Hazcom standard, explains various physical and health hazards, and teaches you how to use warning labels and MSDS properly. VHS/17 Minutes

Hazard Communications the New Millennium Provides information regarding compliance with the requirements of the Hazard Communication Standard: Definition of hazardous materials; Written Hazcom plan and requirements; Hazard classification system, routes of entry; MSDS, proper labeling and storage. 26:37 Min

Hazardous Waste Safety - Parts 1 & 2 Areas covered include identification, control, site hazards, protective clothing, decontamination, work practices, medical and emergency response. A fast-paced training to help you start complying with OSHA's hazardous waste regulations. VHS/29 Minutes

Integrated Pest Management for Schools (IPM) Module 1-An Introduction Defines the concept of IPM, shows how IPM can be used in a school setting, and explains the importance of IPM to the health and safety of school children, while emphasizing the importance of cooperation to the success of an IPM Program. VHS/13 Minutes

Integrated Pest Management for Schools (IPM) Module 2-Structural Pest Control

Demonstrates the “how-tos” of applying IPM to the most common pest problems found in non-food handling areas of school facilities, stresses the importance of sanitation and structural modifications in reducing pest problems, and explains chemical application techniques, IPM principles and a four-step process for implementing IPM programs in schools. VHS/17 Minutes

Integrated Pest Management for Schools (IPM) Module 3-Food Handling Areas

Focuses on controlling pest problems in food handling areas, teaches both pest control operators and kitchen staff the how-tos of many common IPM tasks, and demonstrates a four-step IPM approach using the common German cockroach as an example. VHS/ 13 Minutes

Integrated Pest Management for Schools (IPM) Module 4-Bids and Contracts

Outlines the steps in developing a bidding process for commercial IPM providers to school systems, defines IPM principles, explains the role of the contract officer and the importance of clearly defined bid specifications, and emphasizes how to avoid problems in IPM contractual agreements. VHS/13 Minutes

Integrated Pest Management for Schools (IPM) Module 5-The Administrative Challenge

Explains from an administrator’s perspective the importance of having a clear IPM policy and the importance of cooperation and communication in a school IPM plan. Emphasizes the benefits of an IPM plan to a school system and the role of an IPM coordinator. VHS/10 Minutes

Integrated Pest Management for Schools (IPM) Module 6-Landscaping

Provides a comprehensive overview of the elements of IPM in landscape areas. Outlines the specifics of mechanical, cultural, biological, and chemical control methods. VHS/25 Minutes

Keeping Track of Hazardous Waste

Simple instruction techniques shows every worker how to fill out manifests, recognize warning labels and understand their instructions, and maintain data sheets. VHS/22 Minutes

Safety Awareness

Points covered: safety attitudes, ladders, PPE, lift trucks, MSDS, back injuries, slips-trips-falls, power tools, lockout/tagout, and confined space. VHS/ 18 Minutes

Sexual Harassment: Serious Business

This video is designed to help employees—as well as supervisors, managers and other personnel—understand the impact of hostile environment and quid pro quo harassment on the individual and the company; Be aware of how our actions or behavior affects co-workers; Recognize and stop harassing behavior and replace it with respect; and Prevent sexual harassment in the workplace by promoting open lines of communication. VHS/30 Minutes

MAINTENANCE & OPERATIONS

ABCs of Supervision An on-screen narrator reinforces the major points of SAFE playgrounds. A must for people involved in playground supervision and training. VHS/13 Minutes

The Back Care Program A series of five training modules dedicated to training employees on proper use and care of the back.

Module 1: "Back Facts" teaches how the back works, how injuries occur, and how to have a healthy back. VHS/30 Minutes

Module 2: "Common Causes of Back Problems" teaches how to recognize harmful conditions and to

change or eliminate them. VHS/30 Minutes

Module 3: "Treatment of Back Problems" shows the most common types of back problems and how a medical practitioner can treat them. VHS/30 Minutes

Module 4: "Ergonomics and Body Mechanics" concentrates on good body mechanics and proper sitting, pulling and lifting techniques. VHS/30 Minutes

Module 5: "Healthy Back Exercises" discusses and demonstrates exercise and fitness techniques for a healthy back. VHS/30 Minutes

Bend Your Knees The video discusses why back injuries occur and how to avoid them. VHS/22 Minutes

Chain Saw Training An interview with a chain saw injury victim brings home the dangers of this equipment. Included: Pre-operation safety checks, controlling chain saw kickback, OSHA required safety clothing, and proper cutting techniques and body positions. VHS/16 Minutes

Don't Blow It Protecting yourself from asbestos while servicing brakes. VHS/16 Minutes

Electrical Safety Overview Geared to all audiences on safety awareness. Covers basic safety rules when working with electrical equipment. VHS/10 Minutes

Employee Safety Orientation Covers general hazards regarding exposure, proper clothing, personal protective equipment, machine guarding, reporting accidents and additional safety reminders. VHS/14 Minutes.

Fire Extinguishers This video covers important information for training fire extinguisher basics and fire prevention. It demonstrates how to use fire extinguishers and the different classes of extinguishers. VHS/12 Minutes

FISH Imagine a workplace where everyone chooses to bring energy, passion, and a positive attitude with them each day. An environment in which people are truly connected to their work, to their colleagues, and to their customers. Impossible? Not at all. FISH! Is a tool to help you lead people toward creating that environment.

Forklift Operator Training Written by the National Safety Council. Can be used for operator training. Covers safe operation, load handling, etc. Instructor's manual also available.

Hand and Tool Safety Excellent program to help reduce injuries when using hand and power tools. Explains electrical safety, impact tools, wrenches, cheater bars, and miscellaneous safety when using hand and power tools. Emphasizes safe behavior and attitude. VHS/13 Minutes

Hand Tool Safety in the Workplace (hand tool and automotive tool reference chart and product liability guide for manufacturers) This video provides a comprehensive discussion regarding a wide range of hand tools. This is an excellent initial training video or it can be used as a refresher. VHS/29 Minutes

Handling Spills in the Workplace New live-action video shows actual employees as they react intelligently to the most common hazardous material spills. Workers learn the simple techniques that can make the difference between a major disaster and a minor inconvenience. VHS/18 Minutes

Hazard Communication For Schools-The Road to Safety Compliance with OSHA's most-cited standard

(1910.1200) is made easier with this new program designed specifically for educators. This program details the training requirements of the Hazcom standard, explains various physical and health hazards, and teaches you how to use warning labels and MSDS properly. VHS/17 Minutes

Hazard Communications the New Millennium Provides information regarding compliance with the requirements of the Hazard Communication Standard: Definition of hazardous materials; Written Hazcom plan and requirements; Hazard classification system, routes of entry; MSDS, proper labeling and storage. 26:37 Min

Hazardous Waste Safety - Parts 1 & 2 Areas covered include identification, control, site hazards, protective clothing, decontamination, work practices, medical and emergency response. A fast-paced training to help you start complying with OSHA's hazardous waste regulations. VHS/29 Minutes

Herbicide Use & Safety in the Landscape 1 & 2 VHS/30 Minutes

Integrated Pest Management for Schools (IPM) Module 1-An Introduction Defines the concept of IPM, shows how IPM can be used in a school setting, and explains the importance of IPM to the health and safety of school children, while emphasizing the importance of cooperation to the success of an IPM Program. VHS/13 Minutes

Integrated Pest Management for Schools (IPM) Module 2-Structural Pest Control Demonstrates the “how-tos” of applying IPM to the most common pest problems found in non-food handling areas of school facilities, stresses the importance of sanitation and structural modifications in reducing pest problems, and explains chemical application techniques, IPM principles and a four-step process for implementing IPM programs in schools. VHS/17 Minutes

Integrated Pest Management for Schools (IPM) Module 3-Food Handling Areas Focuses on controlling pest problems in food handling areas, teaches both pest control operators and kitchen staff the how-tos of many common IPM tasks, and demonstrates a four-step IPM approach using the common German cockroach as an example. VHS/ 13 Minutes

Integrated Pest Management for Schools (IPM) Module 4-Bids and Contracts Outlines the steps in developing a bidding process for commercial IPM providers to school systems, defines IPM principles, explains the role of the contract officer and the importance of clearly defined bid specifications, and emphasizes how to avoid problems in IPM contractual agreements. VHS/13 Minutes

Integrated Pest Management for Schools (IPM) Module 5-The Administrative Challenge Explains from an administrator’s perspective the importance of having a clear IPM policy and the importance of cooperation and communication in a school IPM plan. Emphasizes the benefits of an IPM plan to a school system and the role of an IPM coordinator. VHS/10 Min.

Integrated Pest Management for Schools (IPM) Module 6-Landscaping Provides a comprehensive overview of the elements of IPM in landscape areas. Outlines the specifics of mechanical, cultural, biological, and chemical control methods. VHS/25 Minutes

Lawn Mower Safety Provides the viewer with all the essential information for the safe operation of lawn mowers, both walk-behind and riding. VHS/25 Minutes

Lock-out/Tag-out Safety Training Meet 29 CFR 1910.147 requirements. Demonstrates correct lock-out/tag-out procedures from shutdown to startup, with scenes from workplace environments. VHS/15 Minutes

Loss Prevention for Custodians VHS/18 Minutes

Loss Prevention for Maintenance Workers VHS/18 Minutes

NATEC Occupational Safety & Health Effects Health effects of asbestos exposure.

Operating Forklifts Safely This program is designed to teach workers how to operate forklifts safely, including loading and unloading, maintenance checks, and safe driving.

Protective Clothing and Equipment Gives employees the information they need to select the appropriate equipment for the hazards they face. Teaches the correct way to wear, maintain, and store protective clothing and equipment. Incorporates the latest OSHA regulations and requirements on fit-testing protocols. VHS/25 Minutes

Safe Playgrounds An informative video designed to provide an overview of the importance of supervision, age appropriate design, falls to surfaces, and equipment maintenance to playground safety. An excellent educational tool to use in discussing playground safety with professional and community groups. VHS/15 Minutes

Safe Practices For Custodial Workers Shows practical information for custodians, including lifting safety, using chemicals, bloodborne pathogens protection, and ladder safety to name a few. VHS/25 Minutes

Safety Awareness Points covered: safety attitudes, ladders, PPE, lift trucks, MSDS, back injuries, slips-trips-falls, power tools, lockout/tagout, and confined space. VHS/ 18 Minutes

Sammy's Playground Pointers A playground-related injury brings Sammy, the Raccoon, to the school nurse's office. As he describes his recess adventures, Nurse Meyers and Frieda, a student playground helper, suggest ways to play safely. Key points include informing kids that equipment is age specific and the importance of telling adults about problems. An excellent educational tool to use with children grades K-3. Educates with music, drama, humor, and rhyme. Teaching guide accompanies the video. VHS/10 Minutes

Sexual Harassment: Serious Business This video is designed to help employees—as well as supervisors, managers and other personnel—understand the impact of hostile environment and quid pro quo harassment on the individual and the company; Be aware of how our actions or behavior affects co-workers; Recognize and stop harassing behavior and replace it with respect; and Prevent sexual harassment in the workplace by promoting open lines of communication. VHS/30 Minutes

Step-By-Step Safety Training Program This ladder safety program is designed to teach users how to use a ladder properly and safely. Viewers will learn how to choose the right ladder for each job and how to set it up, how to spot a damaged ladder, and how to work safely while on the ladder.

Time Out for Safety This video is presented by playground professional Terri Hendy. The video briefly explains the major causes of playground accidents and things to be aware of on public playgrounds such as proper surfacing, entrapments, entanglements, etc. The video also stresses the importance of playground maintenance, age-appropriateness, and supervision. VHS/10 Minutes

Working With Pesticides Covers proper work practices, handling, storage, and disposal. Good overall

coverage.

You and Your Spine: Back Education for Special Education VHS/17.05 Minutes

OFFICE

The Back Care Program A series of five training modules dedicated to training employees on proper use and care of the back.

Module 1: "Back Facts" teaches how the back works, how injuries occur, and how to have a healthy back. VHS/30 Minutes

Module 2: "Common Causes of Back Problems" teaches how to recognize harmful conditions and to change or eliminate them. VHS/30 Minutes

Module 3: "Treatment of Back Problems" shows the most common types of back problems and how a medical practitioner can treat them. VHS/30 Minutes

Module 4: "Ergonomics and Body Mechanics" concentrates on good body mechanics and proper sitting, pulling and lifting techniques. VHS/30 Minutes

Module 5: "Healthy Back Exercises" discusses and demonstrates exercise and fitness techniques for a healthy back. VHS/30 Minutes

Bend Your Knees The video discusses why back injuries occur and how to avoid them.. VHS/22 Min.

Bloodborne Pathogens General Awareness Provides the basic information required to protect employees from bloodborne pathogen exposures.

Bloodborne Pathogens In Schools - Real Real Life This video discusses the three A's—*Awareness, Attitude, and Action*—of bloodborne pathogens (BBP) in schools. Information is provided on identification of BBP, transmission, personal protection, and control methods. VHS/20:30 Minutes

Bloodborne Pathogens-Protection In Educational Environments This video details OSHA's Bloodborne Pathogens Standard (1910.1030) and the training specifically mandated for educators. VHS/20 Minutes

Ergonomics Awareness Stresses the key role employees can play in identifying ergonomic concerns and making adjustments to their own work habits and processes. It identifies common sources of cumulative trauma disorders (CTDs) and other injuries and suggests initiatives employees can take to protect themselves. VHS

FISH Imagine a workplace where everyone chooses to bring energy, passion, and a positive attitude with them each day. An environment in which people are truly connected to their work, to their colleagues, and to their customers. Impossible? Not at all. FISH! Is a tool to help you lead people toward creating that environment.

Get Well Soon Preventing injuries in the office. Emphasizes slips, trips, and falls. VHS/25 Minutes

Hazard Communications the New Millennium Provides information regarding compliance with the requirements of the Hazard Communication Standard: Definition of hazardous materials; written hazcom plan and requirements; hazard classification system, routes of entry; MSDS, proper labeling and storage. 26:37 Min

Hazard Communication For Schools-The Road to Safety Compliance with OSHA's most-cited standard

(1910.1200) is made easier with this new program designed specifically for educators. This program details the training requirements of the Hazcom standard, explains various physical and health hazards, and teaches you how to use warning labels and MSDS properly. VHS/17 Minutes

Office Ergonomics The overall objectives of this program are to enable all those involved to: (1) explain what Cumulative Trauma Disorders are and give examples of jobs and work habits that can lead to employee musculoskeletal problems. (2) Identify what can be done to reduce injury and illness risk factors. (3) Analyze and correct problems in their own workstations and work methods.

Office Safety Slips, falls, back injuries, and fires are all preventable! The video covers how to identify hazards, better housekeeping and other basic safety practices, and how to avoid office hazards. VHS/14 Minutes

Office Safety: It's A Jungle In There Every year, about 4000,000 office workers get hurt at work. This video shows how working in an office is a lot like being in the jungle—the dangers are hidden and subtle. VHS/20 Minutes

Sexual Harassment: Serious Business This video is designed to help employees—as well as supervisors, managers and other personnel—understand the impact of hostile environment and quid pro quo harassment on the individual and the company; Be aware of how our actions or behavior affects co-workers; Recognize and stop harassing behavior and replace it with respect; and Prevent sexual harassment in the workplace by promoting open lines of communication. VHS/30 Minutes

Workstation Adjustment Encourages employees to adjust their workstations to achieve the right fit for them. It shows optimal heights for work surfaces, proper posture to maintain in seated or standing work and minor modifications that can be made to equipment, and stresses that a workstation can and should be tailored to the needs of the person who works at it. VHS

Universal Precautions for School Staff A training video on bloodborne pathogens. VHS/16 Minutes

You and Your Spine: Back Education for Special Education VHS/17.05 Minutes

SPECIAL EDUCATION

ABCs of Supervision An on-screen narrator reinforces the major points of SAFE playgrounds. A must for people involved in playground supervision and training. VHS/13 Minutes

Advanced Techniques for Special Ed Bus Drivers Key points: How to protect your back when assisting an ambulatory student; Proper response to a student having a seizure; the role communication plays between parents, drivers, and students; Bloodborne pathogen cleanup for a Special Ed bus driver; Tips on time management when loading and unloading students; Demonstrations on loading and unloading techniques. VHS/18 Minutes

The Back Care Program A series of five training modules dedicated to training employees on proper use and care of the back.

Module 1: "Back Facts" teaches how the back works, how injuries occur, and how to have a healthy back. VHS/30 Minutes

Module 2: "Common Causes of Back Problems" teaches how to recognize harmful conditions and to change or eliminate them. VHS/30 Minutes
